

llama2_7b: the <pc, pi, nc, ni> tetrahedron on the first three tcPCs
 each canonical view looks down the axis that collapses one contrast; nearer points are larger

depth is **negation**

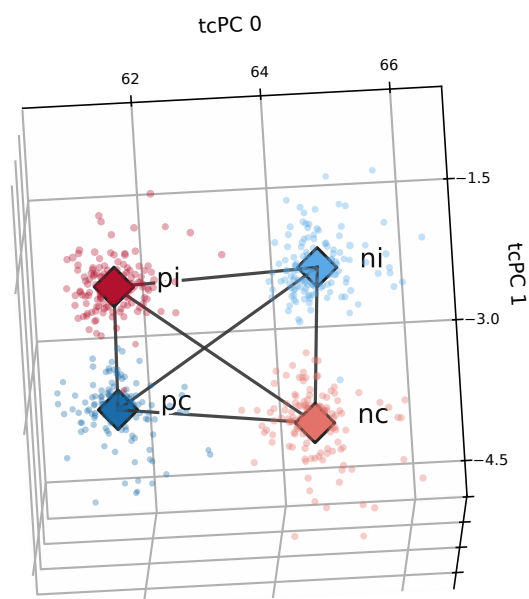

base x truth (1.473 x 0.574), aspect 0.39, 78° apart

depth is **base**

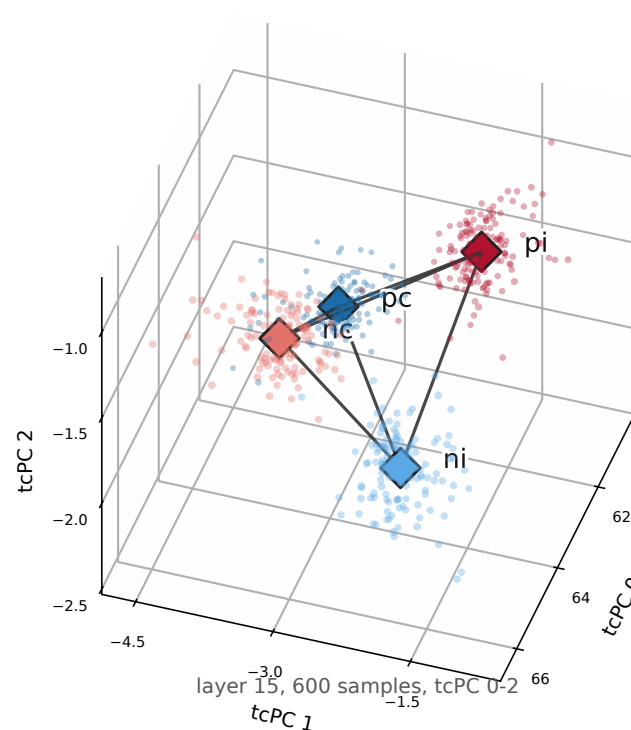

negation x truth (3.088 x 0.574), aspect 0.18, 88° apart

depth is **truth**

negation x base (3.088 x 1.473), aspect 0.47, 87° apart

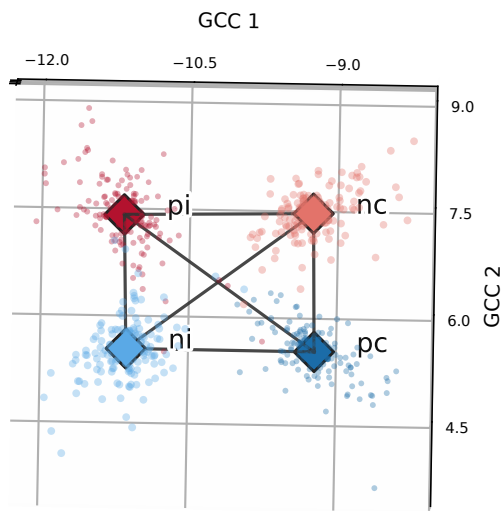

depth is **oblique** (clear of all three axes)

◆ pc — pos / correct (T) ◆ pi — pos / incorrect (F) ◆ nc — neg / correct (F) ◆ ni — neg / incorrect (T)

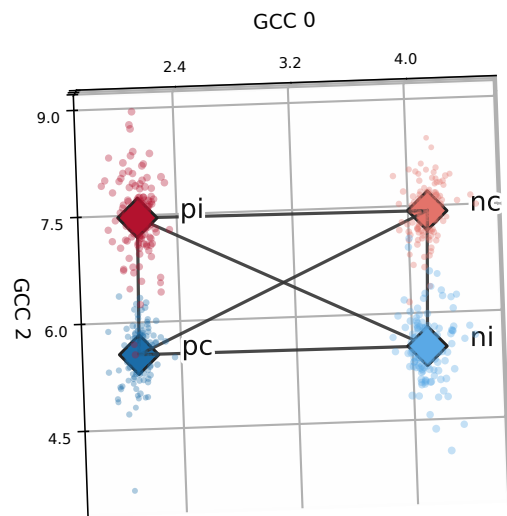

llama2_7b: the <pc, pi, nc, ni> tetrahedron on the first three GCCs
each canonical view looks down the axis that collapses one contrast; nearer points are larger

depth is **negation**

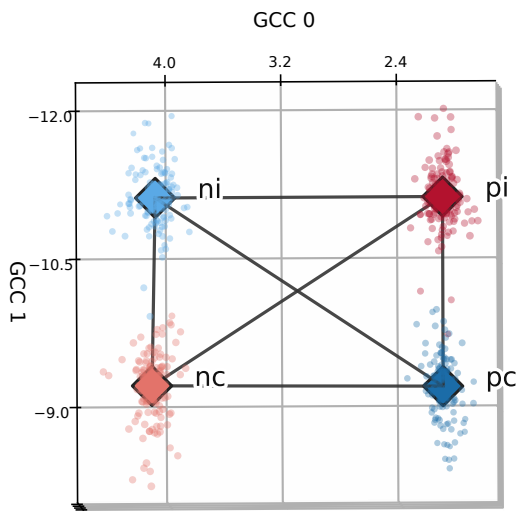

base x truth (1.911 x 1.907), aspect 1.00, 90° apart

depth is **base**

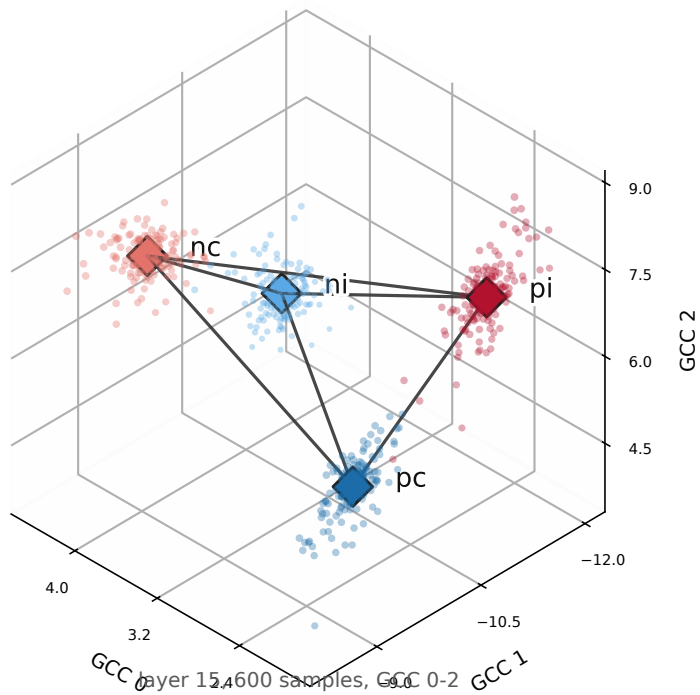

negation x truth (2.001 x 1.907), aspect 0.95, 90° apart

depth is **truth**

negation x base (2.001 x 1.911), aspect 0.96, 90° apart

depth is **oblique** (clear of all three axes)

◆ pc — pos / correct (T) ◆ pi — pos / incorrect (F) ◆ nc — neg / correct (F) ◆ ni — neg / incorrect (T)
