

llama3_8b: the <pc, pi, nc, ni> tetrahedron on the first three tcPCs
 each canonical view looks down the axis that collapses one contrast; nearer points are larger

depth is **negation**

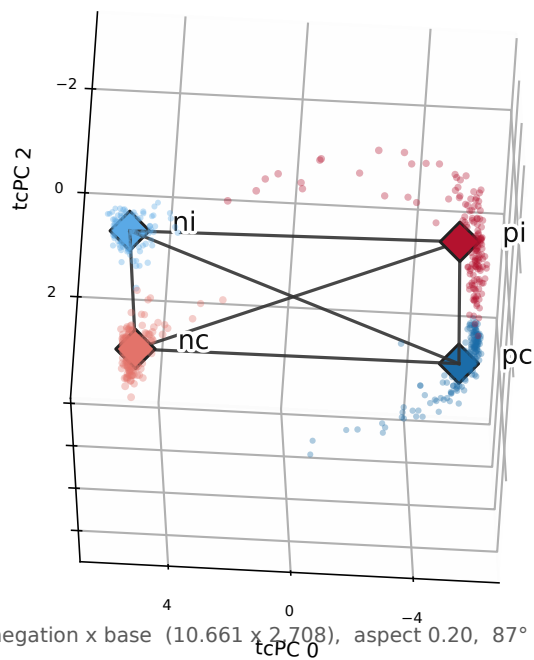

base x truth (2.708 x 2.920), aspect 0.93, 53° apart

depth is **base**

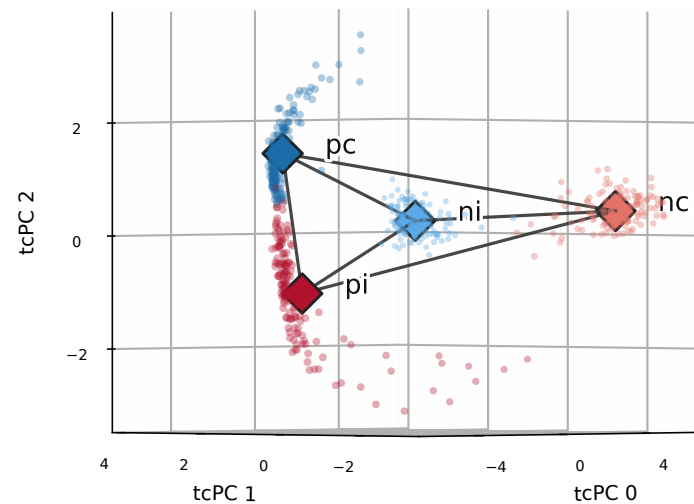

negation x truth (10.661 x 2.920), aspect 0.22, 88° apart
 tcPC 0

depth is **truth**

negation x base (10.661 x 2.708), aspect 0.20, 87° apart
 tcPC 0

depth is **oblique** (clear of all three axes)

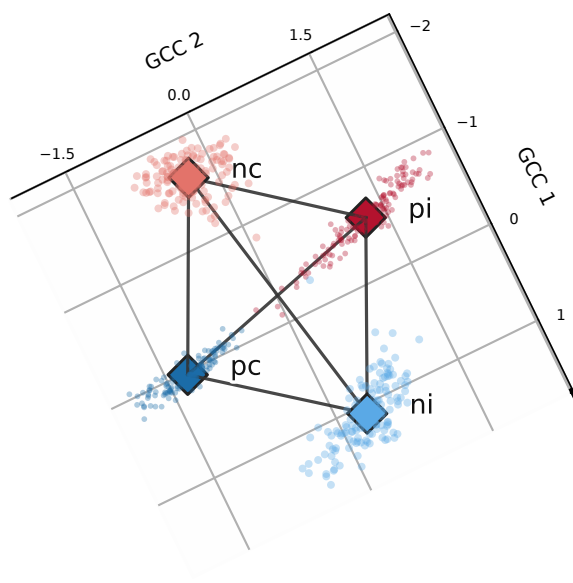

layer 15, 600 samples, tcPC 0-2

◆ pc — pos / correct (T) ◆ pi — pos / incorrect (F) ◆ nc — neg / correct (F) ◆ ni — neg / incorrect (T)

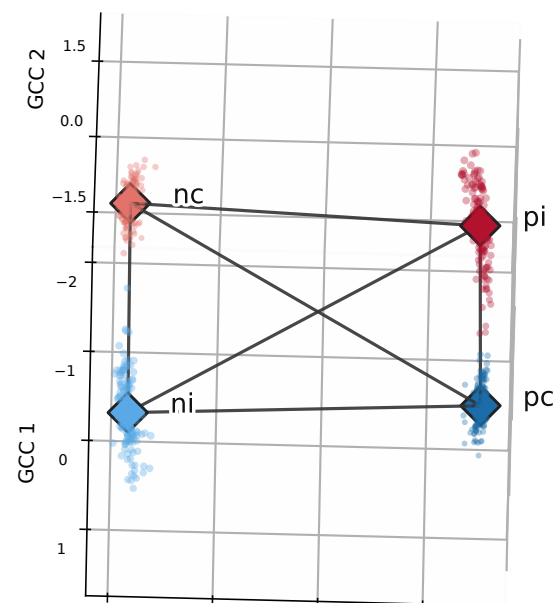

llama3_8b: the <pc, pi, nc, ni> tetrahedron on the first three GCCs
 each canonical view looks down the axis that collapses one contrast; nearer points are larger

depth is **negation**

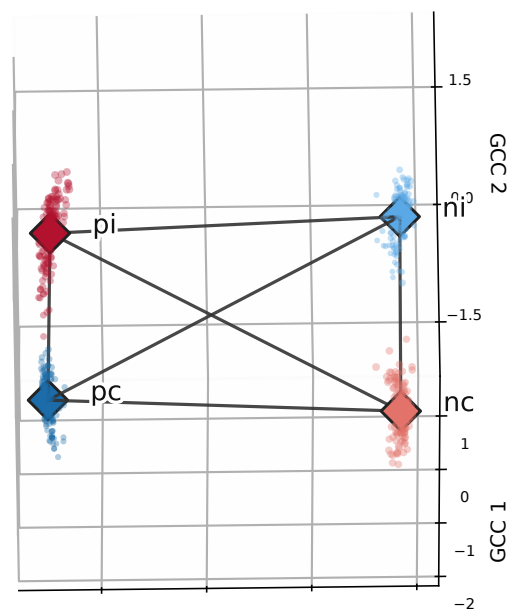

base x truth (1.905 x 1.903), aspect 1.00, 86° apart

depth is **base**

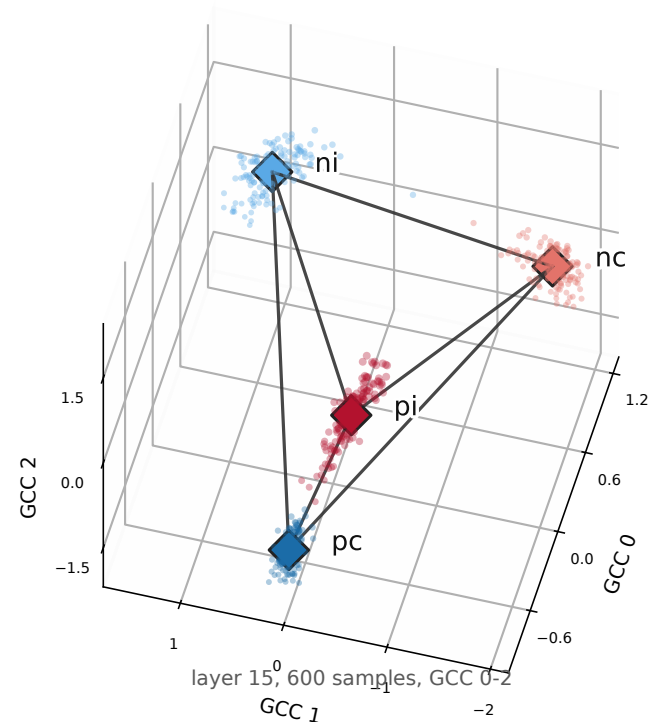

negation x truth (2.006 x 1.903), aspect 0.95, 90° apart
 GCC 0

depth is **truth**

negation x base (2.006 x 1.905), aspect 0.95, 90° apart
 GCC 0

depth is **oblique** (clear of all three axes)

◆ pc — pos / correct (T) ◆ pi — pos / incorrect (F) ◆ nc — neg / correct (F) ◆ ni — neg / incorrect (T)
